Cycling tracks in Dubai

The RTA said it is “considering the technical and legislative requirements to allow the operation of electric scooters to add to the situation and commitment of scooter riders.”

“But you can use your e-scooters in closed areas, if they are allowed by the Dubai Municipality, including in parks and inside the campuses,” Mousa Al Raeisi, director of Monitoring and Enforcement at RTA’s Licensing Agency, said.

He added that the RTA is not the first government entity that has enforced a ban on e-scooters to use the roads designed for vehicular traffic and motorized transportation. He said the study and will come up with relevant laws, including prohibiting the burning of e-scooters like what we require for motorcycles,” Al Raeisi noted.

So, at present, what are the laws and regulations governing the use of bicycles and other non-licensed modes of transport and mobility?

The RTA said in a report under Article 21: “Cyclists shall stick to the right side of the road at all times, and not in the middle of the road, when giving a hand signal. They may not ride in a zigzagging manner, nor may they use excessive speed, or any other manner that may result in endangering the public.”

The RTA also said that it aims to extend the cycling tracks to 560km by 2022 from the current 385km. The total length of cycling tracks in Dubai from 2006, where there were only 230km, until 2018 end. Back in 2006, there were only 230km cycling tracks in Dubai which may result in endangering the public.

The RTA also said that it aims to extend the cycling tracks to 560km by 2022 from the current 385km.

Cyclists shall stick to the right side of the road and are prohibited to ride on pavements.

Cyclists are prohibited to ride it without holding the steering rod, or holding it with one hand.

Cyclists shall ride in one lane. They should be in control of their ride and will not leave it unattended. They shall stay in the right side of the road when travelling.
